

LOCAL GOVERNMENT 2020-21

Professor NICOLA PASINI

Program

The course is divided into two parts:

Didactic Unit 1

Program

Division of political power between nation-states and local governments in Europe and North America: the division powers (vertical or territorial). Local government as an institution and local government as an activity (or local *governance*). Local governments as public institutions close to citizens. The municipality as the first area of democracy and political participation. Local governments as producers of essential public goods and services. Public policies as a product of an intense intertwining between different levels of government (from Europe to the municipalities, passing through the State and the regions). The transfer of functions from the centre to the periphery: political decentralization and administrative decentralization (between differentiated autonomy and new centralism: the Italian case in a comparative perspective at the time of Covid-19). How local welfare and the third sector change between new corporate, community and territorial welfare.

Didactic Unit 2

Program

- Governance of cities and *global cities* before and after Covid-19: urban territories as fundamental hubs of political processes, with local, regional, national and international implications. The new protagonism of cities and regions inside and outside national borders. The transformations of *government* and *governance* of cities, understood as city-regions and, in some cases, as city-states. The functions of cities and sub-national bodies, no longer aimed solely at the management of local public services in terms of municipal or local welfare, but above all at the formulation of an international strategy.
- Local development: the growing degree of complexity of the decision-making process on a sub-national scale. The governance of local public services (water, electricity, gas, waste collection, etc.) through the so-called *multi-utility* companies (towards a new relationship between politics and the economy?); participatory processes, *governance* logic, analysis and impact and process assessments of local public policies.
- Urban centers as subjects of change and as amplifiers of humans' strengths: creativity, entrepreneurship, desire to do. The new morphology of cities during Covid19 between *politics* and *policy*: the factors of humankind's weakness and the management of uncertainty.
- [Urban@it](#) City Report: the gap between politics and cities.

Program information

FOR ATTENDANT:

During the course some privileged witnesses on the topics covered by the course will be invited. In addition, some exercises will be carried out through the analysis of some national and foreign websites on: indicators of quality of life in cities, universal and international exhibitions, Olympics etc. Concerning the in-depth analysis of these topics, supplementary and substitute readings to the reference texts will be indicated and illustrated by the teacher (preferably in English).

In the last part of the course, students must necessarily present some research projects on themes and topics chosen in agreement with the teacher and related to case studies on local and regional, Italian, foreign and comparative dynamics and processes. On these projects (from which micro-papers will be elaborated or elaborated) there will be a partial evaluation in order to pass the exam.

In particular, during the second teaching unit, with the help of some privileged witnesses, reference will be made to various case studies, taken from local public policies:

- a) territorial marketing or area marketing, an organized activity that helps political decision-makers to define strategies to make territories attractive, considered to be composed of tangible and intangible elements: Milan Expo 2015 and Post-Expo; The Milan-Cortina 2026 Winter Olympics;
- b) politics and economics: divergences and convergences with regard to the new municipal and regional capitalism between *polity*, *politics* and *policy*. The role of *multi-utility* companies;

- c) cities and the challenge of immigration: the search, in a comparative perspective and in a multilevel logic, of best practices;
- d) Milan and the suburbs: universities at the service of the city. How to rethink the places and spaces of the metropolis. Analysis of an ongoing empirical research: Municipality of Milan, *Milano City School Project*, Milan, 2020; Comune di Milano, *Rigenerare la città. Le periferie al centro*, Milano 2020; AaVv., Costellazione Milano. Contributi di ricerca per un'esplorazione del campo urbano, Feltrinelli, e-book, 2020;
- f) Rethinking cities, their morphology, functions at the time of Covid19: from *smart city* to *smart land*?

The exam will take place orally (attending and non-attending students) on all the topics covered in the course. The exam program for NON ATTENDING STUDENTS, except for the above differences, is the same as that for attending students.

Didactic material and bibliography

Material (Didactic Unit 1)

Mandatory for all:

- L. BOBBIO, *I governi locali nelle democrazie contemporanee*, Laterza, Bari-Roma, 2015 (ultima edizione).

At the student's choice, one of the following texts:

- M. CACIAGLI, *Regioni d'Europa. Devoluzioni, regionalismi, integrazione europea*, Il Mulino, Bologna, 2006;
- V. CESAREO, N. PAVESI (a cura di), *Il Welfare responsabile alla prova. Una proposta per la società italiana*, Vita e Pensiero, Milano, 2019;
- B. DENTERS & E.R. LAWRENCE (ed.), *Comparing Local Governance. Trends and Developments*, Palgrave Macmillan, Basingstoke, UK and New York, US, 2005;
- C. DE VINCENTI, R. FINOCCHI GHERSI, A. TARDIOLA (a cura di), *La sanità in Italia. Organizzazione, governo, regolazione, mercato*, Il Mulino, Bologna, 2011;
- F. GELLI (a cura di), *La democrazia locale tra rappresentanza e partecipazione*, F. Angeli, Milano, 2005 (cap. I + 5 capitoli a scelta dello studente);
- L. HOOGHE, G. MARKS & A.H. SCHAKEL, *The Rise of Regional Authority*, Routledge, London, 2010;
